

ICE.app

In Case of
Emergency

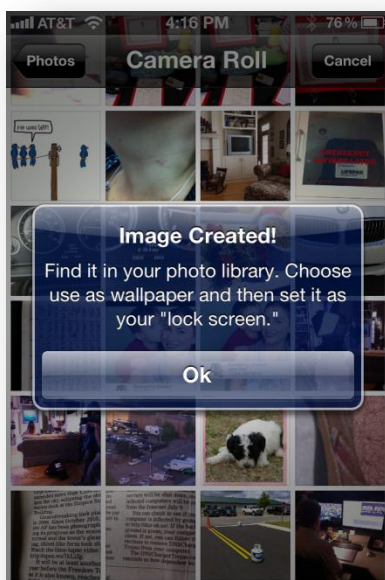

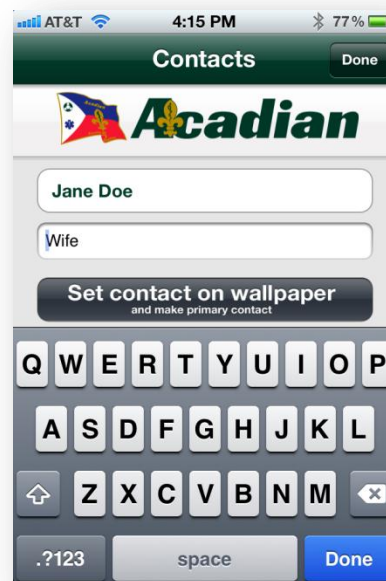

Instructions for iPhone®

1. Download app: Search "Acadian I.C.E." in the App Store or scan the QR code.

2. Once the app is downloaded, start the app by pressing the icon
3. You will see an alert asking you to add at least one contact:

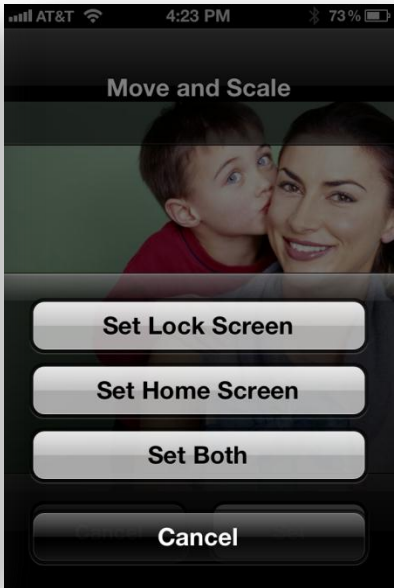

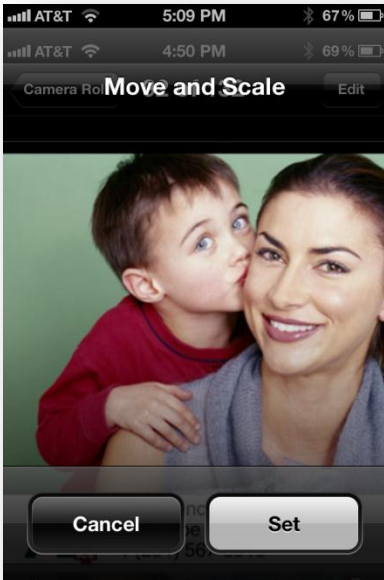

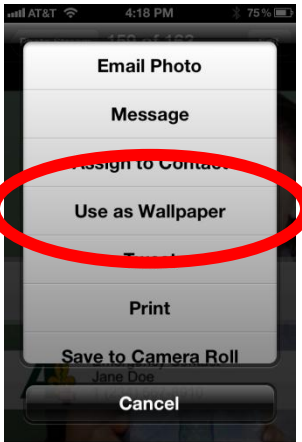

4. Press "OK", then press "Please chose a contact". Select your contact from the iPhone® contact list

5. Press "Set contact to wallpaper". Your photo library will appear and you can choose the photo you'd like as your wallpaper. Once you select the photo, you will receive an "Image Created!" message.

6. Exit the program and open your photo library. The image you created will be the last one in your "camera roll". Press the "share" icon on lower right of photo and select "Use as Wallpaper"

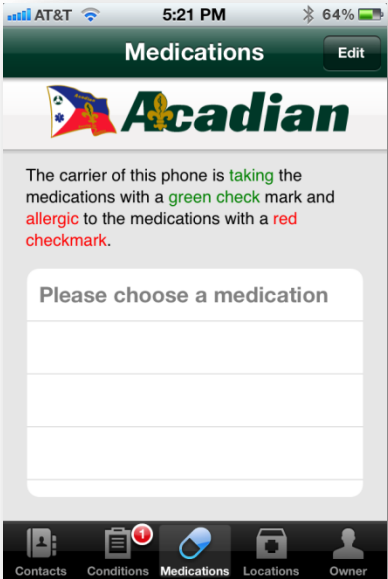

7. Move and Scale photo as desired. Then press "Set" and select "Set Lock Screen"

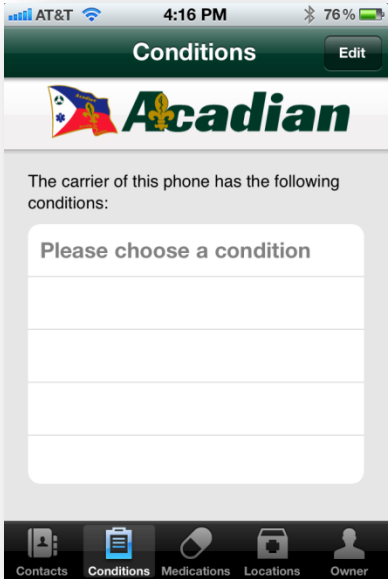

Note: "Lock Screen" is the screen that appears when you first press the sleep button and "Home Screen" is the image that appears behind your icons. For this app, it is suggested you select "Lock Screen"

8. Go back to the Acadian I.C.E. app and select “Conditions” tab at bottom. Press the “Edit” button in the upper right of the screen and select any conditions you have from the list and/or enter your custom conditions. When finished, select “Medications” tab and enter that information using the same method.

Note: Please indicate which medications you are **taking** with a **green check**, and medications you are **allergic** to with a **red check**.

9. Enter your information on the “Owner” tab.
